European Regional Development Fund

Renewable Community Empowerment in Northern Territories (RECENT) is a 3 year project funded by the EU Northern Periphery and Arctic Programme aiming to increase energy knowledge in rural communities, and help them to have more resilient and energy efficient public infrastructure capable of handling climate change related risks.

Renewable Energy Solutions for Sustaining Rural Communities conference being held on **27th April** at 9am in **Westport**, Ireland is an opportunity to help increase rural communities' knowledge of renewable energy and maximise potential of community owned water assets. The conference will introduce 6 speakers from renewable energy and water sectors and include lunch and networking opportunities.
